To: Superintendent Mary Gormley
From: John P. Phelan 
RE: Class Size

Date: February 23, 2010

Please see the attached "class size" documents (3) for all six Milton Public Schools. There are three documents, one for each level: elementary, middle and high. The committee asked to see the "raw" data from each level in conjunction with the class averages that were previously provided in the budget presentation. The documents provided for this memo may need some interpretation given the limited formatting and the complexities of the scheduling process. Please note the brief explanations for each level that may help the reader negotiate the documents.

Document #1: Elementary Enrollment Chart

The chart is broken down by school, grade, program (French, English, Co-Taught) and class. Please note in the bottom line of each school section an area labeled "All Sped PreK-5." The numbers in this line are students who are "included" or mainstreamed into the "regular" education classes above. As an example, in the Collicot Grade 5 line there are three classes, two English classes (27 and 26 students) and one French class (20 students) and 7 students in the "All Sped PreK-5" line. Those seven students are included into one (in this case the French class of 20) of the classes above. This results in a class size of 27 for a significant portion of the instructional day. The 7 students who are included were NOT reflected in the "class averages" provided in the budget presentations. Also please note in two third grade classes – one in Collicot (9 students) and one in Cunningham (12 students). These two amounts reflect ONE combined third grade class with student from both schools. The numbers are reflected in two sections for state reporting purposes.

Document #2: Pierce Middle School Course Section List

This list is sorted by course name. The last column indicates the actual class size. Please note that there are some classes that are designed to be small in size as they are special education and MCAS support programs. There are other outlier class size numbers due to the function of scheduling.

Document #3: Milton High School Course Section List

The list is sorted by course name. Please note that there are some classes that are designed to be small in size as they are special education and MCAS support programs. There are other outlier class size numbers due to the function of scheduling and unique single course offerings. It should be noted that some classes are combined by subject for the levels of Advanced Placement (AP) and honors designations to be more efficient. Lastly, you must follow the class size numbers by the "time" column as there are several line entries that make up one class of students. Please see the example for the teacher McDonough who teaches Anatomy and Physiology during period "D" which has been starred on your packet. There are two separate entries of 22 students and 4 students for this one class. This is a total of 26 students. It is a common error to read that Ms. McDonough may have a class of 4 students, which is inaccurate.
