## Tucker Met Targets in Narrowing the Proficiency Gap <br> (Cumulative PPI) in the Aggregate and Subgroups

## Is Tucker Making Progress in Closing the Achievement Gap?

- Tucker rated Above Target in ELA growth for ALL students and in all Subgroups.
- Tucker rated Above Target in Math growth for ALL students and in all Subgroups.
- Tucker received extra credit for:
- ELA, Low Income Subgroup
- ELA, White Subgroup
- Math, African- American Subgroup

- Have gaps in performance between student groups decreased over time?

Yes.

- Have all groups of students gained over time?

White- decrease in ELA; steady math and science.
Afr. Am/Black- increase in performance

- What is the magnitude of the gap between groups? Gap is decreasing but continues to be notable.
- How does each group of students currently perform compared to state?
- Tucker scores above state in all areas for African Am/Black subgroup.

Have gaps in performance decreased over time?

- Inconsistent. Females gains in math and science.

Have all groups of students gained over time?

- Inconsistent year to year.
- Generally females have made gains over time.

What is the magnitude of the gap between groups?

- Females are catching up to males.

How does each group of students currently perform compared to state?

- Tucker scores above the state in Math \& ELA (both males and females).
- Tucker scores slightly below the state in Science for males.

Has student performance in subgroups increased over time?

- Increase in performance in ELA \& Math
- Decrease in performance in Science.

Have all groups of students gained over time?

- Non Low Income inconsistent.
- Decrease in Low Income, Science

What is the magnitude of the gap between groups?

- Decrease in ELA \& Math but gap remains significant.

How does each group of students currently perform compared to state?

- Perform above state in ELA and Math.
- Slightly below in LI Science.
