**Milton Police Department** - Two full-time School Resource Officers assigned to the Milton Public Schools are on site, and available to monitor and assist youth at risk. We have sent numerous police officers to Crisis Intervention Training to provide them with the advanced skills and resources to react appropriately to situations involving mental illness, developmental disability or emotionally disturbed persons. Additionally, all our officers are being certified in Mental Health First Aid. The Department has a strong partnership with the National Alliance on Mental Illness (NAMI) and other local agencies to help us develop protocols and programs, as well as utilize jail diversion approaches for treatment in lieu of arrest. Also, the Chief is actively involved with the MSAPC. A part-time mental health clinician will soon be available to the Department, thanks to a recent grant we received.
