**Mass Audubon: Baby Birds & Their Nests, Ages 3-8**

**10:00 AM-11:00 AM**

Learn about nature, make a clay sculpture, and have fun at the library! In our second program, participants will observe many different types of real bird's nests from our nest collection. This will allow them to feel and learn about the natural materials that birds use to make nests. After listening to a story about a mother robin caring for her nest and observing the real nests, each child-caregiver pair will then make their own nest out of natural material. The nest will be self-contained in a paper bowl. Once the nest is made, each child will use air dried clay to sculpt several eggs and one parent bird to place in their nest. Each group will get to keep their nest and once the clay dries, they will be able to paint the eggs and birds.

This nature and art program is brought you by the Mass Audubon's Museum of American Bird Art and is funded by the Milton Cultural Council.
