

# Milton Public Schools

## PROTOCOL: STUDENT/STAFF IS A CLOSE CONTACT OF A POSTIVE CASE

### Who is considered a close contact or potential close contact?

Any person, or cohort, who came within 6 feet  
of a person infected with COVID 19  
for a cumulative 15 minutes.

**Close contacts** will be notified by the Milton Health Department or MPS personnel and be instructed to monitor their symptoms and self-quarantine for 14 days. An individual may be identified as a close contact by the school.

**Testing** is not required by the district and does not shorten the 14 day self-quarantine period. However, if symptoms develop, the individual should contact a health care professional.

**Siblings/household members** of a close contact must stay home until the close contact tests negative or the quarantine is complete.

**If the close contact does not test or tests negative for COVID-19:** The student or staff member must remain symptom free for 24 hours and follow the 14 day quarantine to return.

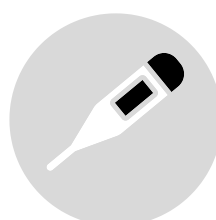

**If the close contact tests positive for COVID-19:** The student or staff member should:

**Stay Home**

**Notify the school  
and close contacts**

**Monitor  
symptoms**

**Assist the school/  
Health Department  
with contact tracing**

---

The positive student or staff member will need to stay in isolation for at least 10 days AND until they have been fever free for 24 hours AND experienced improvment in symptoms AND received clearance from public health authority contact tracers.
